Professional Summary

Full-Stack Software Engineer and CS Master's Candidate at Pace University (3.82 GPA). Proficient in JavaScript, TypeScript, and React.js with a focus on building responsive web applications and ML-integrated systems. Experienced in Agile methodologies, microservices architecture, and implementing clean coding practices for impactful user-facing features.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, Python, C++, C, Rust, Go.

Web Technologies : React.js, Node.js, Next.js, AngularJS, Express.js, Flask, Django.

Databases And Cloud: MongoDB, MySQL, PostgreSQL, AWS, Firebase.

Tools: Git, Docker, REST APIs, JSON, Apple Health Kit, Agile/Scrum, CI/CD.

Technical Experience And Projects

Eat and Fit – Fitness Application — Full-Stack Developer

- Developed a comprehensive dashboard to visualize caloric intake and workout consistency for end-users.
- Leveraged Apple Health Kit to automate health data synchronization, eliminating manual user entry.
- Utilized Chart.js to create interactive visualizations, helping users track long-term progress against fitness goals.

AI Text Detection System — Lead Developer

- Engineered a full-stack platform using React.js and Node.js to classify text as AI-generated, human-written.
- Integrated NLP libraries to identify linguistic patterns, increasing detection transparency for content-creators.
- Optimized frontend state management for real-time text analysis, reducing latency for large content.

Supplements E-commerce Platform — Full-Stack Developer

- Architected a MERN stack e-commerce solution featuring dynamic product catalogs and specialized dietary filters.
- Designed a scalable microservices architecture using Redux to synchronize user carts across sessions.
- Implemented JWT-based authentication and secure API endpoints to streamline the checkout experience.

Skin Disease Detection System — ML Engineer

- Directed a team of 4 to build a diagnostic system achieving 85 % classification accuracy for dermatological conditions.
- Orchestrated the preprocessing of 10,000+ images using CNN, reducing false positive rates by 30%.
- Developed a Flask-based API for seamless image uploads and integrated a user feedback loop for model refinement.

Education

Pace University, New York

Sept 2023 – Dec 2025

Master's in Computer Science

- CGPA: 3.82/4.0
- Relevant Coursework: Artificial Intelligence, Deep Learning, Python Programming, Mobile Web Development.

Vignans Institute of Information Technology

2018 – 2022

Bachelor of Science - Computer Science

- CGPA: 7.44/10
- Relevant Coursework: Computer Programming Using C, Java Programming, Python Programming, Machine Learning, Fundamentals of Block Chain Technology
